

# Women in Science & Technology: Fostering Innovation

A two-day conclave that blends science and technology with entrepreneurship.

The **Science and Engineering Research Board (SERB)** is committed to fostering an inclusive environment that promotes innovations in science and technology. Taking steps to promote inclusivity and diversity, SERB is partnering with the **Indian Institute of Technology Gandhinagar (IITGN)** to organize a two-day conclave for women researchers, scientists, and engineers. The event aims to encourage women associated with Science and Engineering fields to translate

their innovative ideas into technology. It hopes to instil within the participants the spirit of entrepreneurship and facilitate discussions about translational research and its challenges. The SERB-sponsored conclave will be conducted at IITGN. It will host approximately 150 participants, many of whom are beneficiaries of various SERB schemes (POWER, Core Research Grant and IMPRINT) and whose research has translational potential.

## DATES

September 29 - 30, 2022

## VENUE

Jibaben Patel (Kanisa) Memorial Auditorium (300 Auditorium)

## EVENT COORDINATORS

Prof Sivapriya Kirubakaran, Prof Sriram Kanvah, Prof Iti Gupta and Prof Bhaskar Datta  
IIT Gandhinagar

Dr Monika Agarwal, Dr Rajwant and Dr Anima Johari  
Science and Engineering Research Board
